

BACKPACK TAILPAINTER

DIRECTIONS FOR USE

1. Screw spigot cap onto a 2 litre bottle of FIL Detail.
2. Stand backpack upright and place this bottle plus another in the backpack.
3. Put on the backpack adjusting shoulder straps until comfortable.
4. Click wiper brush onto applicator head.

To set Dose:

Turn the dose adjuster band clockwise to move the plunger forward until the front face of the plunger lines up with required dose, as marked on the barrel. Turning the dose adjuster band anti-clockwise increases the dose.

To Prime:

Operate applicator by squeezing handle until the product appears in the barrel. Cautiously squeeze handle to expel all air. Care should be taken to avoid spillage during this procedure.
