

STOCK IODINE

DIRECTIONS FOR USE

Use only in areas of iodine deficiency. Diets containing 0.5mg I/kg DM will more than adequately meet the iodine requirements of cattle, sheep, goats and deer.

WATER SUPPLY

Add 5ml Stock Iodine for every 1000 litres of water to give 0.125mg/litre.
Ensure stock DO NOT have access to any untreated water sources.

DRENCHING

Drench using the following amounts as per 10 animals:

Dairy cows	4-8ml
Sheep	1.5-3ml
Pigs	3-6ml
Fow	0.3-0.6ml
Horses	3-7ml
