

## DIRECTIONS FOR USE

### FIL Foam Mark

Foam Mark should be sprayed in one spot on the top of the animal's back or hip. Shake can well before use. Hold the can approximately 15cm from the animal and spray for 2-3 seconds. Soon after spraying the foam will rise to form a coloured blob which is easily seen from a distance even in poor light. After a short period (approximately 30 minutes depending on conditions) the foam sport will disappear.
