Attestation of Compliance - Re: Livestock healthcare products

This attestation is based on the requirements of the AsureQuality Organic Standard as amended from time to time.

This attestation does not allow nor encourage commercial use of AsureQuality's name or branding in association with the following products, nor does it imply endorsement of the products or manufacturer.

This attestation confirms that the composition of the following products distributed by Farmers Industries (NZ) Ltd have been assessed by AsureQuality as compliant for use in organic livestock production by operations certified to the:
AsureQuality Organic Standard
Ministry for Primary Industries: Organic Export Requirements
USDA National Organic Program

The distributor must report any composition or product changes to AsureQuality for re-evaluation. Furthermore, the composition of products must not be derived from GMO sources.

Effective period of verification: 04/08/2026 – 04/08/2027

This document expires at the end of 12 months (the termination date of the effective period identified above), or when cancelled by AsureQuality.

Signed:

Sandra Williams
Quality and Technical Operations Manager

Helping Aotearoa shape a better food world

Name	ACVM_Number	Restriction
Active Teat Cream	A010764	RESTRICTED - For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant.
Antigerm SA33		RESTRICTED - Must not be used on food contact surfaces
Black Strap Molasses		RESTRICTED - Only to be used as a livestock health treatment, not to be used as a regular part of the livestock feed. Records of purchase & use must be maintained on file for audit purposes.
BLOATEZE	A004986	RESTRICTED - For use in affected livestock only - it cannot be used as a preventative treatment or in the absence of illness. May only be used when preventative practices and veterinary biologics are inadequate. Number of treatments, withholding period (if applicable), and records of purchase & use must be maintained on file for audit purposes.
Bloateze DFA	A009084	RESTRICTED - For use in affected livestock only - it cannot be used as a preventative treatment or in the absence of illness. May only be used when preventative practices and veterinary biologics are inadequate. Number of treatments, withholding period (if applicable), and records of purchase & use must be maintained on file for audit purposes.
C3		RESTRICTED - This product which has been "approved" for use on milk contact surfaces in milking sheds shall be used in a way to maintain the organic integrity of the dairy product. Specific product conditions of use must be adhered to. After use, an intervening event between the use of the product and the contact of the milk on the surface must occur eg, A hot water post sanitiser use potable water rinse. The intervening event must be sufficient to prevent residual contamination of the milk.
FIL Active Teat Conditioner		RESTRICTED - For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant.
FIL Emollient Salve	A001298	RESTRICTED - For use as a topical treatment. Records of purchase & use must be maintained on file for audit purposes.
FIL Footrot Aerosol	A000292	RESTRICTED - For use in affected AQ/EU/CH livestock only - cannot be used as a preventative treatment or in the absence of illness. May only be used when preventative practices and veterinary biologics are inadequate, and subject to compliance with AsureQuality Organic Standard sections 5.9.5 (records & identification of treated stock), 5.9.1 (double with-holding periods), and 5.9.7 (max. number of applications). It is the operators responsibility to ensure that the applicable market requirements are met. The use of this input must be notified by submitting a completed Emergency Treatment Form to AsureQuality. The use of antibiotics under USDA NOP and Taiwan is prohibited and any stock treated in emergency situations including suckling offspring would need to be culled.

FIL Impact Red		RESTRICTED - This product which has been "approved" for use on milk contact surfaces in milking sheds shall be used in a way to maintain the organic integrity of the dairy product. Specific product conditions of use must be adhered to. After use, an intervening event between the use of the product and the contact of the milk on the surface must occur eg, A hot water post sanitiser use potable water rinse. The intervening event must be sufficient to prevent residual contamination of the milk.
FIL Iodoshield Active	A007853	RESTRICTED - For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant.
FIL Milkers Wipes		RESTRICITED - For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant.
FIL Organic Teat Conditioner	A011900	RESTRICTED - For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant.
FIL Peracetic Acid		RESTRICITED - Description: This product which has been "recognized" for use on milk contact surfaces in dairy factories shall be used in a way to maintain the organic integrity of the dairy product.
